

# JOB POSTING

---

**LOCATION**..... Research & Development Center – Taylor, WI  
**POSTING DATES:**..... August 9, 2017  
**DESIRED STARTING DATE:** ..... ASAP  
**POSITION**..... **Product Development Engineer**  
**STATUS**..... Full Time  
**NUMBER OF POSITIONS** ..... 1  
**WORK SCHEDULE** ..... First Shift - Flexible  
Schedule may vary to meet business demands  
**WAGE RANGE** ..... Based on Experience

## **SCOPE OF JOB:**

The Product Development Engineer will focus on identifying and developing new products that support BMC's core business and/or open new paths for growth. This will involve meeting with internal and external customers to understand product development opportunities, as well as laboratory research, coordinated with all stakeholders to prototype solutions. Lastly, the Product Development Engineer will work closely with operations teams, process engineers and materials suppliers to help develop the manufacturing process and supply chain. Some travel will be required and will vary based on schedules for technical conferences, customer visits, outside testing, etc.

## **QUALIFICATIONS REQUIRED BY POSITION:**

- Master's degree in materials or chemical engineering or related discipline, or Bachelor's degree with 3-5 years of experience
- 1-3 years of experience in product research and development
- Experience in silica related industries would be favorable
- Strong creative ability to generate new ideas/out of the box thinker
- Experience in a laboratory and with design of experiments
- Excellent written and oral communication skills
- Ability to articulate in a non-technical manner to allow others to understand
- Professional presentation skills
- Strong analytical and reasoning abilities are a must
- Solid problem solving and organizational skills
- Self-motivated and able to work independently or with a team
- Ability to work in a self-directed team environment
- Occasional travel may be required
